PLOT RESERVED FOR "ROUGH RIDERS" BE LAST RESTING PLACE

NOTED FIGURE IN AMERICAN MILITARY LIFE DIED IN BOSTON EARLY SUNDAY

By Associated Press.
Washington, Aug. 8.—The little plot in Arlington Cemetery, set aside for the "Rough Riders" regiment of the Spanish-American war, tomorrow will receive the remains of the regiment's commander, Major General Leonard Wood, who died early yesterday at Boston.

At the request of his widow, the distinguished soldier and late governor of the Philippines will be laid at rest beside his comrades of the stirring days of '98.

The body, accompanied from Boston by Mrs. Wood and a military escort will arrive in Washington early in the day and, following the present plans, be taken at once to Arlington for the interment ceremonies.

High officials of the War Department and of the government generally will accompany the funeral cortege along Pennsylvania avenue and down the winding road to the cemetery, while the military guard of honor will be augmented here by the third cavalry, the sixteenth artillery, a battalion of infantry and a detachment of engineers.

By Associated Press.
Boston, Aug. 8.—The long and spectacular career of Major General Leonard Wood, governor-general of the Philippines, is ended. Death came early Sunday at the Peter Bent Brigham hospital in this city where he underwent an operation Saturday.

In deference to the wishes of Mrs. Wood, who accompanied him when he came to the hospital for observation four days ago, hospital officials withheld from the public the fact that General Wood was there until Saturday noon. Late Saturday night, Dr. Alexander Lambert of New York said that an operation had been performed and that his condition was critical. Shortly after 2 o'clock Sunday morning hospital officials announced that he had died at 1:20 a. m.

Dr. Lambert's bulletin indicated that the operation was for a tumor.

"Governor General Wood," he said, "17 years ago had a tumor which was removed by Dr. Cushing of Boston. It was then found that the growth had involved the bone of the skull and a probable recurrence of the trouble was anticipated. For some time he had evidence of his former lameness but owing to his high sense of duty he was unwilling to leave his post in the Philippines until he felt that the situation there justified a temporary absence."

General Wood was operated on for hernia in Manila last January. As soon as she had recovered sufficiently and conditions in the islands permitted he returned to America. Recently he visited President Coolidge in Rapid City, S. D. The end came in the city where he started his career. General Wood, who was born in Winchester, N. H., on Oct. 9, 1860, was house surgeon at the Boston City Hospital for a year after his graduation from the Harvard Medical School in 1884.

"The army of the United States stands at last salute to a great soldier, a great administrator and a great American."

The secretary also issued a statement reviewing the many tasks the general had undertaken for the Nation, declaring that besides being "an able military leader," he was a "citizen of great prominence whose field of activity extended much beyond the army with which he was customarily identified."

Maj. Gen. Charles P. Summerall, chief of the general army staff, also wired Mrs. Wood that the army mourns "with you over the loss of our illustrious comrade." He also issued a statement declaring that General Wood was distinguished "as much for his achievements as a civil administrator as for his leadership as an officer."

Loses Great Soldier.
"The Army has not only lost a great soldier," he added, "but the country has lost a great patriot and public servant whom death alone could part from his post of duty."

Aside from officials of the Government, the general's death came as a shock to his many friends in private life in the capital, a number of whom have felt for some time that his duties as governor-general of the Philippines might be overtaxing his strength.

It was recalled here that his administration in the islands had been a tempestuous one and that almost from the day he took office—Oct. 15, 1922—he found himself in sharp conflict with the two outstanding nationalist leaders, Manuel Quezon, president of the Senate, and Manuel Roxas, speaker of the House, who bitterly opposed his policies and several times had the Legislature adopt resolutions demanding his recall.

Little Miss Jean McAtee is recovering from an operation at the Corsicana Hospital and Clinic.

Miss Opal Thompson, who has been seriously ill with typhoid at the Navarro County Hospital, is reported slightly improved.

COUNTY TAX RATE SET AT 45 CENTS; SAME AS LAST YEAR

COMBINED RATE OF COUNTY, STATE AND ROAD DIS- TRICT IS \$1.87

The county tax rate of 45c per \$100 valuation for the ensuing year was determined at the regular monthly meeting of the Commissioners' Court of Navarro county Monday morning. The State tax rate is 67c, making the combined State and county rate \$1.12. Road bonds for consolidated road district No. 1 tax will be 75c, bringing the total tax rate for property within this district, exclusive of school taxes, to \$1.87 per \$100 valuation.

The budget submitted by County Auditor J. M. Tullis for the year from August 1, 1927, to August 1, 1928, was adopted by the court.

The delinquent tax roll of levee districts submitted by Tax Collector George W. Boyd for the years from 1919 to 1926, was approved.

All returns on the election held August 1, on the four proposed amendments to the State constitution have not been received by the county clerk and the canvassing of the returns will be held later.

The monthly claims were allowed except as noted on the claim docket.

There was \$160 transferred from the general fund to the hospital fund.

The bonds of J. B. Tucker of Purdon and Wince and J. D. Hill of Dawson as public weighers were approved.

H. Gentry, county demonstration agent, appeared before the court in the interest of the terracing school which will be held for two days near the I. O. O. F. Home during the latter portion of the present month. After discussion, the court went on record approving this school and aiding in the making of it a success. A large number of persons will attend this school and in that manner, learn how to terrace land. It is understood that several other counties in this section have taken similar action.

The following is the tax rates:

General fund, 13c; jury fund, 3c; interest and sinking fund court-house bonds, 1c; permanent improvement fund, 3c; road and bridge fund, 15c; county maintenance road fund, 10c. Total county rate, 45c.

The following will be the road district taxes:

Consolidated road district, No. 1, 75c.
Road district No. 3, 35c.
Road district No. 4, 70c.
District No. 5, 35c.
District No. 7, 60c.
District No. 8, 60c.
District No. 9, 45c.
District No. 10, 70c.
District No. 12, 80c.
District No. 14, \$1.75.
District No. 15, \$1.75.

The following rates apply to levee districts:

Levee District No. 1, \$20.
Levee District No. 3, \$10.
Levee District No. 4, \$20.
Levee District No. 6, \$45.
Levee District No. 8, \$15.50.
Levee District No. 9, \$44.
Levee District No. 10, \$40.
Levee District No. 3, Henderson county, which embraces a portion of Navarro county, has not been determined yet.

THIRTEEN PERSONS POISONED SATURDAY ALL OUT OF DANGER

Special to the Sun.

Barry, Texas, Aug. 8.—Thirteen persons were stricken with ptomaine poisoning Saturday afternoon at the Speegle home, one mile east of Barry. The victims were Mrs. J. W. Speegle, the mother; three of her sons, Arthur, Lennie and Louie Speegle; four daughters, Ora and Dorothy Speegle, and Mrs. Wright and Mrs. Elliott; three grandchildren, Edith, L. J. and Janie Wright, and a niece, Miss Novella Franks of Dallas, who is visiting her relatives. The thirteen were taken suddenly ill Saturday afternoon and Drs. Ellis of Blooming Grove and Worsham of Barry were called, and with the assistance of neighbors soon had the situation under control and the patients relieved and it is now believed all are on the way to complete recovery, although they were very ill for a time.

Something eaten at the noon meal is believed to have been the cause of their illness.

Mr. and Mrs. Ed Franks of Dallas and E. J. Speegle came in Saturday night to be with their stricken relatives.

Mrs. C. L. McManus of Dallas, who has been ill in the Navarro County Hospital for several days, was able to be moved to her home Sunday.

Mrs. W. D. Clark of Purdon is in the Navarro County Hospital. Mrs. Alvin Hefflin of Richland is in the Navarro County Hospital.

GOVERNMENT PLACES LOW ESTIMATE UPON 1927 COTTON CROP

THIRTEEN AND HALF MIL- LION BALES INDICATED BY ACREAGE AND CONDITION

By Associated Press.

Washington, Aug. 8.—The first forecast of this year's cotton crop was placed at 13,492,000 equivalent 500 pound bales today by the Department of Agriculture which declared the outstanding factor in the situation this year was the boll weevil menace.

"The infestation is reported by correspondents to be about three times as heavy as it was a year ago." The crop reporting board said, "and is the greatest it has been since 1923 for the same time of the season."

The forecast was four and a half million bales under that of last year.

By Associated Press.
Washington, Aug. 8.—A cotton crop of 13,492,000 equivalent 500 pound bales is indicated for this year, the Department of Agriculture announced today, placing the condition of the crop on August 1 at 69.5 per cent of a normal.

The August first condition of the crop, which compares with 69.8 per cent of a year ago, 65.5 in 1925 and 67.4 in 1924, indicated an approximate yield of 156.8 pounds per acre, compared with 181.9 pounds in 1926, and 155.7 pounds, the average for the last five years.

The total indicated production is based on the assumption that the area abandoned this season will be equal to the average of the last ten years, leaving from 42,683,000 acres in cultivation July 1, an area of 41,139,000 acres for harvest this year. The final outcome of the crop, the department stated, will depend upon whether the various influences affecting the crop during the remainder of the season are more or less favorable than usual.

Last year's crop was 11,977,374 bales, that of 1924 was 16,103,679 bales and in 1923 it was 13,627,936 bales.

The condition of the crop on August 1 by states was:

Virginia	75
Carolina	78
South Carolina	66
Georgia	65
Florida	71
Missouri	61
Tennessee	69
Alabama	70
Mississippi	68
Louisiana	64
Texas	69
Oklahoma	75
Arkansas	68
New Mexico	52
Arizona	35
California	80
All other states	67

Indicated production of Lower California is 62,000 bales.

Mrs. J. F. Lumsden is recovering rapidly from a very serious operation at the Corsicana Hospital and Clinic several days ago.

Mrs. T. T. Bradley is recovering nicely from an operation at the Corsicana Hospital and Clinic several days ago.

Mrs. J. A. McMahon is improving rapidly after a recent operation at the Corsicana Hospital and Clinic.

"Corsicana Has It."

COTTON SOARS FULL LIMIT ON ESTIMATE 13,492,000 BALES

FORECAST IS MILLION AND HALF BALES LESS THAN ANTICIPATED BY TRADERS

By Associated Press.

New Orleans, Aug. 8.—Prices on the New Orleans cotton exchange jumped upward 200 points, or \$10 a bale, on the publication of the government cotton forecast today.

The rise, the most sensational the market has known in several years, swept all months to the full trading limit for the day.

The forecast of 13,492,000 bales was 1,500,000 bales fewer than the trade had expected and when trading was resumed after the fifteen minute recess following publication of the figures, an immediate reversal of sentiment was shown and all months soared upward.

Traders had estimated that the forecast would reach 15,000,000 bales, basing their beliefs largely upon the fact that ginnings to August 1 had been large, totaling 162,678 bales.

The rise carried October from 16.84 to 18.84 and December from 17.10 to 19.10.

New York Market Also Rises Limit

By Associated Press.
New York, August 8.—The government crop report on cotton showing a yield of about 1,000,000 bales under general expectations caused a wild buying movement when trading was resumed at the cotton exchange, sending the price up the full limit of 200 points from the low of the morning.

Ginnings to Date Show Increase

By Associated Press.
Washington, Aug. 8.—Cotton of this year's growth ginned prior to August 1 totaled 162,678 running bales compared with 47,770 bales to that date last year and 161,632 on August first, 1925, the census bureau announced today in its first ginning report of the season. As in previous years ginnings by states were not given.

ALLEGED BURGLARS ARRESTED HERE ARE TAKEN BACK GRIMES

The three men arrested here the latter part of last week by members of the city police department in connection with the robbery of two stores in Navasota, were turned over to Sheriff Hudson of Grimes county late Saturday and taken to Anderson, county seat of Grimes county, by him. They were photographed and their fingerprints taken by the local department expert, Desk Sergeant Roy Vinson, and copies sent to the clearing house by Chief Knight.

Miss Anna Belle McManey of Longview, who has been in the Corsicana Hospital and Clinic for several days, was moved to her home in Longview Monday.

CHARACTER of Service

rather than quality of service, is the manifest measure of merit.

Fifty-four years' experience in financing the development of our section of Texas has made this institution one of the strongest in power of resource; and to merit this volume of business it has constantly adhered to sound banking principles.

GROWING CHURCH LOSSES

Growing annual church mem-
bership losses, which in late years
have amounted to hundreds of
thousands in some of the larger
denominations, are stirring active
religious workers to search for
means of correcting the tendency.

The Continuation Committee after
a careful examination of the facts
has reported to the Inter-Church
Conference that, in effect, the con-
dition constitutes a challenge
which must be met by "renewed
faith that Christ is still with His
church and can bring it again in-
to a fuller life and ultimate vic-
tory over all its foes, provided it
gives Him its utmost co-operation."

But it is admitted that there can
be no single course of action ap-
propriate to all denominations.
Each church must study its own
problem and find the remedy for
the increasing membership at-
tention. On certain causes of the
failure of the churches to hold and
add to their list of members the
conferers were agreed. The report
says:

"Probably all will admit that the
World War, with its profound po-
litical, social and industrial dis-
turbances, has had a disastrous
effect upon the Christian civiliza-
tion, with its appeal to brutal in-
stincts, its lowering of moral tone
and its benumbing influence upon
the spiritual life of Christianity.
To this must be added the deaden-
ing character of the materialistic
movement of the age, which has
brought indifference, neglect and
disregard of religious obligation
to the very altars of the Church.
While the church coffers have not
seemed to suffer diminution, they
have nevertheless given forth an
unholy sound of the careless drop-
ping of gold and silver, as though
material offerings could make up
for the diminishing sense of spir-
itual gifts. Must we not agree
that the quickening of the spiri-
tual life is of most immediate con-
cern?"

Pastors are not held blameless
for the losses and one potent cause
of the decline of members is found
to be the application of disciplin-
ary methods to those who have be-
come neglectful of their church
duties. The pastors must insist
upon the growth of grace and rely
upon real leadership by themselves
to hold the old and attract new
members. Also it is advised that
money demands be put on a basis
which will make them appear less
of a tax. It will be interesting to
observe how fruitful the renewal
of the call to faith can be made
in this sadly materialistic age, as
the report describes the present.

IN BEHALF OF THE RED BIRDS

A prominent Corsicana woman—
a lover of birds—one who is ac-
tive in the protection of these lit-
tle feathered creatures—phoned
the editor yesterday to register a
complaint.

The complaint was righteous
and something should be done to
remedy the situation.

Her complaint was that a number
of small boys in her neighborhood
were unnecessarily and without
cause slaughtering red birds in
large numbers. It seems that the
juvenile hunters invaded her
grounds one day this week and that
a total of six red birds were killed
and wounded as the result of their
activities. These extensive grounds
are a sanctuary for birds and over
a score of red birds make their
homes in the trees and shrubbery
that adorn the place. They build
their nests and raise their young
in the sanctuary and are a pleasure
and joy not only to the owners
but to their many friends.

This lover of birds keeps food
and water placed where it is easily
accessible for her feathered tenants.
No wonder she complains when a
raid is made on the sanctuary.
She also stated that she loved lit-

tle boys but she must insist on the
little boys leaving her birds alone.

Of all the sweet singing birds the
red bird ranks among the first.
It is not only attractive to the eye
but it spreads happiness to all as
perched upon a limb from its lit-
tle throat there pours out an an-
nouncing stream of golden notes of
sweetest tone which bring glad-
ness and joy to all that hear.

Surely no one will kill one of
these little spreaders of sunshine
if a second thought was taken.
Surely there is no little boy, or
grown person for that matter that
would be the cause of the death
of a single red bird. And at this
time of the year the red bird is
raising its young and when the old
birds are killed there are many
little mouths to go hungry and finally
die of starvation and thirst.

The writer feels sure these boys
responsible for the deaths of the
red birds killed them thoughtlessly
and that if the matter is brought
to their attention in the proper way
they will discontinue the pastime.
If they do not respond to kindness
a sterner method should be used—
and regardless of the method the
killing of red birds should be
stopped. Parents can accomplish
much toward saving the birds.
Teach the child early to love birds
and not to kill them. There is
much more pleasure in "shooting"
birds with a camera than with a
gun or "nigger shooter."

The birds should be protected
and methods should be employed
that will insure their protection.
The premeditated killing of a song
bird is an act that calls for firm
action in punishment.

MAGIC CARPET IS HERE

When we were boys, imagination
still unshaken by experience,
many wonderful things existed as,
at least, dream-possibilities. There
was the cloak which rendered the
wearer invisible; Aladdin's Lamp,
by the rubbing of which powerful
genie could be summoned to do any-
thing the owner of the lamp might
desire; the touch of King Midas;
the magic sword, and so on to in-
finity.

But the one thing pre-eminent,
the one which stirred us to the
remotest depths, was the magic
carpet, on which its owner could
sit and by merely wishing, be
swished to any place on earth, with
the speed of the wind. On a sunny
summer day, lying on the grass,
kicking his heels in the air, any
boy could, with the aid of this car-
pet, hunt lions in Africa, rescue
the daughter of the Emperor of
China, and carry news of the un-
expected advance of the redcoats
to General Washington, thereby
saving the Revolutionary Army.
The magic carpet was the apothe-
osis of adventure.

Then came adulthood and we
said there was no magic carpet.
Then came the Wright Brothers,
and they made the magic carpet a
reality. Look at Lindbergh and his
successors. Look at the proposed
flight from Detroit to Australia
and the proposed flight around the
globe which will be made by Capt.
Erwin starting from Dallas.

And then dream a little of what
is fast coming to all parts of the
world in the magic carpet line and
you can easily picture the neces-
sity of a modern municipal air-
port for Corsicana.

Such an airport would be Corsi-
cana's magic carpet which would
carry us along the path of pros-
perity and progress in a modern
manner.

Dallas is already developing an
airport—Waco is soon to have a
modern airport—air mail service is
to be established between New
Orleans via Houston which puts
Corsicana on the route. Corsicana
must have a municipal air port.
Immediate plans should be per-
fected to this end.

Corsicana has already received
several bales of cotton and many
more will be brought in and mar-
keted within the next few weeks.
We are on the threshold of a busy
fall.

Young men of a generation ago
had lots of pocket money, but, on
the other hand, all of them owned
hats.

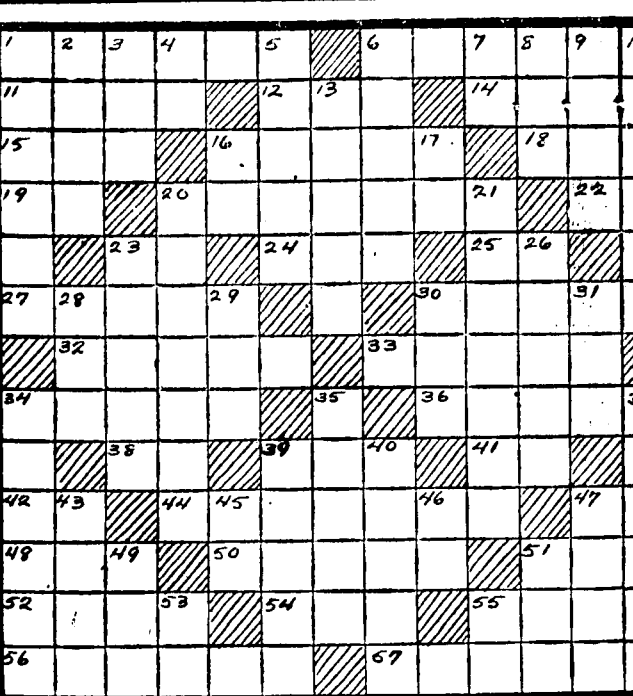

Italy must expand or suffocate,
says Mussolini. Many empires
have done both, in the order nam-
ed.

Religion has failed of its pur-
pose if it is only a means to bigot-
ry opinions.

A New York paper has discovered
that the Anti-Saloon League has
been dabbling in politics. That is
a triumph in revelation.

Adam was the first and only
man to fall for "the only girl in
the world."

FIVE PRISONERS TAKEN FROM HERE TO PENITENTIARY

PENITENTIARY AGENT BUD
RUSSELL DEPLETES POPU-
LATION LOCAL JAIL

Five men, one white man and four negroes, were taken to the penitentiary at Huntsville by Penitentiary Agent Bud Russell Sunday morning. Agent Russell, with eight prisoners from other counties, spent Saturday night at the Navarro county jail and proceeded with the thirteen prisoners to the penitentiary Sunday morning.

Those going to the penitentiary at this time from the Navarro county jail included:

Edward Bush, white man, two years, theft. He recently escaped from a jail in West Texas where he had been two years. He had been sentenced to four years in the district court here about two years ago.

Ike Morris, negro, 2 years, burglary.

Neill Jackson, negro, 22 years for assault with intent to murder. His trial was in connection with the shooting of W. A. Bittner, foreman of the Jester farm and ranch recently. Bittner was shot in the neck and body from ambush and Jackson was arrested after a 48-hour manhunt.

John L. Moss, negro, 2 years, theft.

Snake Moseley, negro, 2 years, manslaughter, in connection with the killing of another negro at Kerens.

Stop That Itching

Use Blue Star Soap to clean the affected parts, then apply Blue Star Remedy. It penetrates the skin, kills out the germs, stops the itching at once, and restores most cases to a healthy condition. Eczema, Tetter or Cracked Hand, Poison Oak, Ringworm, Sore Blistered Feet, Sunburns, Old Shin Sores—all of these have yielded to its wonderful healing power. 60c and \$1.00 jars. Soap 25c. Manufactured by Star Products Co., Cameron, Tex.

DEER TAMED BY HUNGER; COME TO MAN IN WINTER

By Associated Press.
Washington, Aug. 6:—Hunger is nature's common denominator. It tames the wildest deer and brings the stately elk to feed on man-made hay.

In the Kaibab reservation fifty thousand deer dart from man's approach in summer, for Montana grass is green, and their appetites are appeased. Yellowstone's sixteen thousand elk stamp in regal fright when the national park is verdant.

But winter comes, and with it forage is curtailed. Starvation stalks the herds. Deer overreach the Kaibab food supply, nor can they move out, for the Grand Canyon halts them on one side and a desert on the other. The wild state wavers, and the deer turn to human friends.

All summer Uncle Sam has moved alfalfa for his hungry wards. They come to it for food and survive the winter.

SPALDING GOLF CLUBS REDUCED! \$6.50 wood clubs \$3.85, \$5.50 wood clubs \$3.45. Model irons, regular \$3.00 now \$2.45.—City Book Store.

FALL BUSINESS OUTLOOK FOR TEXAS EXTREMELY BRIGHT IS OPINION OF RAILWAY OFFICIAL

By Associated Press.

Dallas, Texas, Aug. 8.—Notwithstanding the fact that business generally in the Southwest is running behind that of last year, the outlook for fall months is by no means unpromising, it is said.

Dallas district manager of the car service division of the American Railway association asserted today in his semi-monthly report.

"The factors of major importance are the size of our cotton crop and cotton prices," Mr. Andrews says in the general summary of conditions for the last half of July. "Indications point to a smaller crop but better prices than last year and if the crop is marketed in an orderly manner the net returns should be very much greater than for the bumper crop of last year, which would restore buying in these quarters, where for several months, it has been restricted largely to actual needs. Another favorable factor is that stocks of merchandise are at low ebb and any substantial increase in purchasing power will very quickly extend its influence to all channels of trade."

"But unless the cotton crop this year returns a profit to the producer, not only will there be no improvement in business, but still a further recession is practically certain. Higher cotton prices are justified from every standpoint but it must be remembered that buyers will give not more than they are compelled to pay and it is strictly up to the producer and his associates whether a buyer or seller market shall obtain this season."

THOSE GOOD DOLLAR EAST-MAN CAMERAS are still on sale at City Book Store.

Livestock Shipments Greater

For the two weeks ending July 28, livestock shipments to Fort Worth were slightly more than during the same weeks last year, according to the report. Shipments of hogs were 39 per cent greater and sheep shipments were 16 per cent less. The increased prices for hogs have encouraged producers. Range conditions continue good except that moisture is needed in a few localities.

Coal production and shipments in Southwest territory are running ahead of last year, but bituminous shipments throughout the United States continue to decline.

Cement production is ahead of last year, and sand, gravel and stone shipments are ten per cent higher. Forest productions are below normal. Shipments of vegetables and citrus fruits from Texas are low, but watermelons are moving in considerable volume.

Railway Equipment Ample
An ample supply of railroad equipment is available although the heavy seasonal movement of perishable products from western states, particularly from California,

is on. Railroads in the southwest report car loadings for the two weeks ending July 23, as 10.2 per cent less and loaded cars received from connections 10.9 per cent less than for the corresponding period of last year.

Carload shipments interchanged at Rio Grande Junctions in June are indicative of the business being done with Mexican businessmen. The cars interchanged from American lines, Brownsville, 14; Laredo, 641; Eagle Pass, 225; and El Paso, 179. From Mexican lines, Brownsville, 4; Laredo, 69; Eagle Pass, 35, and El Paso, 348.

According to Mr. Andrews' report, the volume of public securities as measured by checks to depositors' accounts at banks in seventeen principal cities of the Eleventh Federal Reserve District during June, reflected a gain of 1.4 per cent over May and 2.6 per cent over June of last year. An increase of 10.2 per cent in saving deposits was noted, the number of accounts increasing from 232,632 in June 1926, to 259,495 in June 1927.

Building activities in the district during June, as measured by the permits granted in June a year ago, reflected a decline of 33.4 per cent. Increases, however, are reported at Austin, Beaumont, Corpus Christi, El Paso, Port Arthur, San Antonio and Waco.

DRILLING GOING FORWARD MAGNOLIA HODGE DEEP TEST

Drilling is progressing steadily on the Magnolia R. L. Hodge 1 at Chaffield. This test began drilling Monday and was reported at 1550 feet last Thursday in the chalk. The broken chalk was found at 1550 feet and the solid formation topped at 1625. It had been penetrated about 25 feet at the last report.

This well is located just in front of the school house at Chaffield and is about six miles due east of the Trinity sand test drilled by the Magnolia at Rice earlier in the year. It is planned to make the well a Woodbine test, with some possibilities of going deeper if favorable indications are found.

The Magnolia has several thousand acres under lease in this section of the country, and a majority of the oil operators around Corsicana are of the opinion that this part of the county will provide the next field.

It is the only well drilling in the county at the present time.

All of the test wells in East Texas are drilling deeper with no startling developments. The Earle and Ragdale, and the Southern Pine A-2 are drilling deeper with a fishbit bit; while the Southern Pine B-1 is using a roller bit to penetrate a hard lime formation.

The Reynolds Mortgage Company No. 2 in Cherokee county is rigging up and will likely be spudded in Friday or Saturday.

ALL EXCEPT SEVEN ELEMOSYNARY HEADS WERE REAPPOINTED

By Associated Press.

Austin, Texas, August 6.—All except seven superintendents of the state's seventeen elemosynary institutions were reappointed today for the next two years by the state board of control which had about 35 appointments.

New appointees are:

A. C. Ellis, state school for blind, Austin.

Mrs. S. J. Thomas, women's confederate home, Austin.

Miss Jennie Burleson, home for dependent and neglected children, Waco.

J. S. Halley, orphan's home, Corsicana.

Dr. W. M. Thomas, insane hospital, Rusk.

J. D. Martin, colored deaf, dumb and blind institute, Austin.

Dr. J. W. Standifer, insane hospital, Austin.

Those reappointed:

T. M. Scott, school for deaf, Austin.

Dr. T. M. Bass, epileptic hospital, Abilene.

Dr. J. W. Bradford, school for feeble minded, Austin.

A. W. Taber, Confederate men's home, Austin.

C. E. King, juvenile training school, Gatesville.

Dr. J. W. Johnson, insane hospital, San Antonio.

Mrs. Agnes Stephens, girls training school, Gainesville.

Dr. Geo. F. Powell, insane hospital, Terrell.

Dr. R. McKnight Tuberculosis sanitarium, Carlsbad.

Dr. C. W. Castaner, insane hospital, Wichita Falls.

Miss Burleson, appointed to the Waco children's home to succeed Captain E. B. McMordie, had been superintendent of the Confederate women's home, Austin.

Mrs. Thomas, who succeeded her, has been head of the woman's home before, but was not confirmed by former Governor Miriam A. Ferguson after her re-appointment two years ago.

J. S. Halley, who was appointed superintendent of the State Home for the ensuing two years was a member of the faculty of the city schools of Waco, it was stated by a member of the State Home faculty Saturday afternoon. Mr. Halley comes highly recommended as a school man and a successful administration is expected.

Card of Thanks.

We wish to take this method of thanking all those who were so kind and thoughtful during the illness and death of our husband and father, A. J. Gafford. We appreciate all the many kind favors and also desire to thank those who sent the beautiful floral offerings.

MRS. A. J. GAFFORD.

J. C. GAFFORD.

MUCH INTEREST IN INDUSTRIAL SHOW AT TEXAS STATE FAIR

Special to the Sun.

San Antonio, Texas, Aug. 6.—Returning from a tour of the State in the interest of the Texas Industrial Exposition, which will consist of a display of the manufacturing, mining and power industries of Texas at the State Fair of Texas at Dallas on October 8-23, under the direct management and control of the Texas State Manufacturers Association, with State headquarters located in San Antonio, G. M. Knebel, executive vice-president stated that crop conditions throughout the State were never better, that a splendid fall business can be looked forward to by the commercial interests of the State.

In the Southern section of the State cotton picking is at its height. Within twenty-five to fifty miles of Corpus Christi the highways are crowded with trucks loaded with fruit from twelve bales of cotton on their way to Corpus Christi where large freighters are tied up at the new port and being loaded with cotton.

Much interest is being taken by the industries of the State in the Texas Industrial Exposition and space is rapidly being taken. The power and light interests have been busy for two months on their massive exhibits that will occupy the center of the Exposition building.

While most of the displays will be made by individual manufacturing concerns, however, a number of cities will have composite displays showing just what is manufactured. Sherman, Texas, for instance has a display space of 100 feet frontage.

Mr. Knebel is leaving San Antonio for Houston, Galveston and other Southeast Texas port cities with a view of securing displays showing their port facilities and the opportunities for the location of new and needed industries. On September 1st the headquarters of the Texas State Manufacturers Association will be moved to Dallas to remain only until the close of the Texas Industrial Exposition on October 23rd.

TWO WOMEN KILLED AT GRADE CROSSING FRIDAY AT BRADY

By Associated Press.

Brady, Texas, August 5.—Mrs. P. M. Self, 26, of Brady, formerly Mrs. Wilfred Vear of Brownwood, and her niece, Miss Willie Fay Cawley, 16, of Mercury, were instantly killed at 11 o'clock Friday morning when the car in which they were riding was struck by a freight car being switched here.

Other cars standing on a siding prevented Mrs. Self and the engineer from having a clear view. The bodies were badly mutilated. Miss Cawley had just arrived here to visit Mrs. Self.

Commissioner's Court.

The commissioner's court is in session the latter portion of this week finishing up its work as a board of equalization. The work as a board of equalization will probably be finished Saturday. The regular monthly meeting of the commissioner's court will be held Monday. The returns of the election August 1 on the proposed constitutional amendments will probably be canvassed and other important matters presented.

Warranty Deeds.

Ruth E. Skinner et vir., to Geo. C. Wilson, Lots 8 and 9, block 551, Corsicana, \$2,000.

J. E. Emmmons et ux., to Marcus L. Riley et ux., Lot 7, block 427 A, Max D. Almond Addition, Corsicana, \$3,205.85.

R. J. Graves to R. R. Graves, a part of the Charity Sanders survey, \$10 and other considerations.

WEAK, NERVOUS

Georgia Lady Could Not Sleep

Nights, But After Taking

Cardui She Was "Like a

Different Person."

Comer, Ga.—Mrs. C. H. Smith, of this place, related the following interesting experience:

"I was weak and nervous and run-down. I couldn't sleep at night. I felt tired and not in condition to do my work. I had Cardui recommended to me, but always thought I could outdo most sickness, but this was one time I needed help. I was so weak I could hardly lift my hand."

"I can't express how bad I felt. I know I improved after taking Cardui. I was like a different person. I was built up and was stronger and better than in a long time."

"I have a young daughter who had the 'flu' and after she got up she would once in a while have such severe cramping spells, just suffer terribly. I knew there was a weakness and, hoping Cardui would reach this trouble, I had her take it, and the first bottle helped her so much she was able to leave it off and does not have this trouble now."

Cardui has been in use for more than 50 years.

Purely vegetable, mild, harmless. At all drug stores.

Take CARDUI

A VEGETABLE TONIC

Misses Theresa Wharton and Beatrice Robinson of Blooming Grove were in Corsicana Saturday.

CLAIMED SHOOTING MEXICAN BY PEACE OFFICER JUSTIFIED

By Associated Press.

Oklahoma City, Aug. 6.—A report today by Claude Tyler, state detective, declaring that the fatal shooting of Maximo Rivera, Mexican, by Wade Spears, Oklahoma City policeman July 16 was justified, was the latest development in the diplomatic interchange that has resulted.

Tyler's report was presented to Governor Johnston who had requested an investigation after receiving a letter from Secretary of State Kellogg. H. Valdes, Mexican Consul here, had written to the Manuel Teller, Mexican Ambassador at Washington, asserting evidence showed Spears had shot Rivera in the back as he was running.

A coroner's jury held that the shooting was justified Tyler reported. He said his investigation showed that Spears shot the Mexican after attempting to arrest him for burglary and after Rivera had struck him, nearly knocking him down. The bullet struck the Mexican in the breast and emerged from the back, Tyler said.

Now that the plane and motor have survived the air test of the endurance flight, it is expected that the first of the German transatlantic hops will be undertaken early next week.

Both fliers were wildly cheered by a crowd which had assumed immense proportions after the news spread that the airmen had broken the record set by the Americans. The record was shattered at 9:02 o'clock this morning when the Junkers plane had been in the air 51 hours 12 minutes, the start having been made at 5:50 o'clock Wednesday morning.

Now that the plane and motor have survived the air test of the endurance flight, it is expected that the first of the German transatlantic hops will be undertaken early next week.

Both fliers were wildly cheered by a crowd which had assumed immense proportions after the news spread that the airmen had broken the record set by the Americans. The record was shattered at 9:02 o'clock this morning when the Junkers plane had been in the air 51 hours 12 minutes, the start having been made at 5:50 o'clock Wednesday morning.

RECORD HELD BY AMERICANS SMASHED BY GERMAN FLYERS

By Associated Press.

Dessau, Germany, Aug. 5.—Cornelius Edzard and Johann Ristz brought their Junkers W-33 plane to earth at 10:13 o'clock this morning after having established a new world endurance flight record of 52 hours and 23 minutes. The former record, 51 hours, 11 minutes 25 seconds, was held by Clarence Chamberlin and Bert Acosta.

Edzard and Ristz began the grind at 5:50 o'clock Wednesday morning and spent their long hours in the air "shuttling" between Dessau and Leipzig. The machine made a perfect landing.

Both fliers were wildly cheered by a crowd which had assumed immense proportions after the news spread that the airmen had broken the record set by the Americans. The record was shattered at 9:02 o'clock this morning when the Junkers plane had been in the air 51 hours 12 minutes, the start having been made at 5:50 o'clock Wednesday morning.

Early Showing of New Fall Felts

Adorable, indeed, are these new hats for Fall. Made of new supple felts and velvets, sponsored by Paris. Royal and Navy Blue, Maize, Peach, Rose; Green; Shades of Tan, Wine, Crimson Brown and Black are the important colors. Medium and Small Models are popular for Fall, either of which is unusually becoming because of the odd little kinks and turns in the brims.

THE FIRST SHIPMENT FOR FALL SPECIALLY PRICED AT

\$4.95

BATTERY D LOCAL FIELD ARTILLERY HAS GONE TO CAMP

Following is the roll of Battery D 132nd Field Artillery which left here Saturday afternoon for the summer camp at Palacios, Texas.

First Lieutenant—Beverly C. Caldwell.

Second Lieutenants—Randolph Robinson, Frederick L. Gilliam.

First Sergeant—John R. Brown.

Sergeants—Mommman K. Riley,

Harper Willie, Albert V. Kirkland, Greely Aston, Elmer L. Nutt, Charles K. Leighton, Arthur N. Ashmore.

Corporals—John H. Simmons, Largent Thompson, Frank Garner, Leslie L. Hickey, Albert S. Odom, William H. Smith, James A. Cook, Privates, First Class—John T. Aston, J. T. Fitzgerald, Dewey A. Gordon, Rex J. Moss, Carl N. Odom, Raymond, F. Odom, Forrest V. Redden, Thomas E. Sisson, Butler Thompson, Fauchie P. Thompson.

Privates—Prentice E. Atkinson, Charlie Bone, Ernest Belcher, Lawrence L. Baker, Joseph C. Blackmon, Odell Brent, John E. Brittain, Elbert Carpenter, Thomas J. Claunch, Wiley A. Dye, Richard Fields, James A. Fitzgerald, Elgie A. Frazier, Lois C. Gibbs, John T. Golden, Jim H. Gordon, Thurmon A. Gordon, Robert S. Grace, Clyde J. Groves, Sam C. Green, John T. Griffin, Raymond Grimes, Marvin F. Hagad, John Q. Hancock, Sten-pens H. Harman, George A. Holman, Kelton E. Holloway, Samuel R. Luther, Jr., Morris Madden, E. C. Miller, Emmett F. Montgomery, Charles B. Muirhead, Aubrey Murphy, Ollie Murphy, William E. Nutt, Wendall W. Nutt, Floyd A. Neighbors, Loy Pinson, Nelson Q. Pinson, William L. Richards, Wilson L. Sims, Lloyd Shields, Arvin H. Shugart, Lloyd J. Stubbs, Lee H. Spurlock, Denver C. Tate, Gideon, E. Taylor, John J. Taylor, Raymond R. Thompson, James C. Vandegriff, Cecil W. Vaught, Lewis A. Wadley, William H. Whitehead, Luther H. York.

Headquarters Battery also left Saturday but the roster was not available when they entrained.

MAGNOLIA HODGE WELL IS DRILLING IN HARD CHALK

Hard chalk was still occupying the operators on the Magnolia R. L. Hodge 1 at Chatfield Monday, with the bit around 1785 feet. This well found the chalk at the average level; broken chalk was encountered about 1580, and the solid chalk was found at 1585.

Various opinions are being expressed concerning the well by the different operators; some maintain that there is a likelihood of finding oil and others maintain that the finding of the chalk at the regular level indicates that the well has small possibilities.

Magnolia officials state that the well will be taken to the Woodbine depth which is between 2100 and 2300 feet.

Several shallow wells have been drilled on the Bradley tract west of Tupelo recently, and the derrick was being skidded to another location in this area Monday for the sixth well. Work in this section was started many years ago when

the Andrews Petroleum Company drilled a series of wells, many of which are still producing.

Late in 1926, the Star Production Company acquired a lease in this area and drilled two wells, both of which found the pay sand above 800 feet, with production about five to ten barrels daily. The lease was taken over by the Oil City Iron Works, and three additional wells have been put down. The wells are averaging about four to five barrels daily at about 790 feet.

The oil from these wells tests about 38 gravity. Work will start immediately on the sixth well in this area.

RICHLAND RECEIVES FIRST BALE COTTON FOR 1927 SEASON

The first bale of the 1927 cotton crop was ginned at Richland Saturday. The bale was raised by W. F. Chumley and was ginned by N. F. Middlebrooks. The cotton was purchased by B. C. Lousford at 20c per pound and a premium of \$44 was raised.

Following were the merchants who contributed to the premium:

N. J. Middlebrooks	\$5.00
First National Bank	5.00
First State Bank	5.00
E. B. Winn	2.00
Swink Market	1.00
Service Cafe	1.00

Humble Burros Used To Train Wild Horses

By Associated Press.

San Angelo, Texas, Aug. 8.—The meek and lowly burro, or donkey, still plays an important part in training wild horses.

Yoked to a complacent burro, the horses after a few hours learn to stop, halt, turn and in general to obey the wishes of someone else.

A rope is placed about the horse's nose and about the neck of the burro and they are allowed to run together. After a few hours the wild horse may be tamed and unable to get up, but the burro usually will be able to travel.

SYMPATHIZERS OF SACCO AND VANZETTI PROTEST SENTENCE

Strikes of Colorado coal miners and Paris taxi drivers, the decision of a wealthy Boston man to go to jail rather than pay a fine for inciting to riot and the receipt of anonymous letters threatening to bomb New York skyscrapers, were new developments today in widespread protests against the execution of Sacco and Vanzetti.

Petitions by request for the condemned men for writ of habeas corpus, a stay of execution and a writ of error was denied shortly after noon in Supreme Court at Boston.

The threatening letters received in New York, bearing only the typewritten signatures "The Anarchists of the World for the Freedom of Sacco and Vanzetti," were turned over to Police Commissioner Warren. It was considered likely that they were the work of cranks.

Subway Bombings Sample. "The subway bombings," they said, "are only a sample of what will happen if our comrades are not set free." Further than that, there had still been no evidence uncovered to indicate that the subway bombings Friday night were perpetrated by Sacco-Vanzetti sympathizers, although arrest of a suspect took two detectives to Boston today.

New York police announced that a sedan driven by a man who appeared to be a foreigner, and bearing Massachusetts license plates was seen driving slowly from one of the crowded subway stations.

Police are in possession of the license number.

Paris Taxi Drivers Strike. A general 24 hour protest strike in Paris was recognized by most of the taxi drivers, but otherwise conditions in the French capital were little affected, although there were several small scale demonstrations in various parts of the city.

The Pennsylvania State capital building and the executive mansion at Harrisburg were added to the long list of government buildings under guard.

In Utica, N. Y., two buildings in the Italian section of the city were wrecked by mysterious explosions. Both were unoccupied but several persons in adjoining buildings were slightly injured by flying glass. Police declared, however, that there was nothing to indicate that the blasts were the work of Sacco-Vanzetti sympathizers.

By Associated Press.

Demonstrations in behalf of Nicola Sacco and Bartolomeo Vanzetti heightened in intensity over the week-end in the United States, Europe and South America, and even wider efforts were planned.

Radical leaders in New York promised to draw 500,000 workers from their employment tomorrow in protest against sending the two men to the electric chair at Charlestown, Mass., next Thursday morning, and in other parts of the world sympathizers of the two Italian-Americans continued to plan further demonstrations up to the 21st hour.

Demonstrations were staged yesterday in Paris, London, Munich, Germany, and in Boston and other cities of the United States. No disorders occurred although some arrests were made.

Increased Police Vigilance. Increased police vigilance against disorder was established in the chief cities of the world. Public officials and public buildings in the United States were under special guard while in other countries extra precautions were thrown about the United States representatives and American property.

In New York Police Commissioner Warren prohibited parades but said he would permit a mass meeting in Union Square arranged for tomorrow by the Socialist party, the I. W. W. and the Sacco-Vanzetti emergency committee.

Meanwhile Commissioner Warren said the mobilization of 14,000 policemen on guard throughout the city and at a large number of public buildings and in subway and elevated lines stations would continue "until further notice," and that the hunt for those responsible for the explosion in two subway stations Friday night would go on with unabated vigor.

Excitement in Boston. From six to ten thousand persons milled excitedly about Boston Common yesterday when police re-

ARTHUR N. ASHMORE REPORTED WELL ON ROAD TO RECOVERY

A letter and messages received by relatives in Corsicana from Jesse Ashmore, father of Arthur N. Ashmore, sergeant in a local military unit, who was so severely injured while en route to camp at Palacios with army equipment early Friday, state that Arthur, who is in the base hospital at San Antonio, is doing nicely and seems on the road to recovery, following the amputation of his left arm just below the shoulder.

The following account of the accident was taken from the San Antonio Express:

Rosenberg, Texas, Aug. 5.—A. N. Ashmore, a Texas National Guardsman is in the Rosenberg hospital in a serious condition, the result of his arm being run over by a Southern Pacific troop train near here early Friday morning.

The first troop train passing here going to the encampment at Palacios, stopped here and several of the men got off to get coffee and sandwiches. When the train arrived at Hangerford, 20 miles west of here, the train crew was notified that Ashmore was missing. The crew in turn notified an eastbound freight and some two hours later Ashmore was found in the yards here, with his arm nearly severed just above the elbow.

He was taken to the local hospital where it was found necessary to amputate his arm just below the shoulder. He is not able to talk very much and his identity was established by some papers he had in his pockets. The adjutant's department at Austin was notified and is sending a man here to take care of the case. He is from Corsicana.

At 5:30 p. m. the hospital attaches stated that he was resting easy, and should no complications arise, should recover.

Spoken speaking permits on stands where Sacco-Vanzetti sympathizers had been substituted for speakers to whom permits had been issued. One was arrested for refusing to obey police orders to cease talking.

Signorina Luigo Vanzetti, sister of one of the condemned men, was the chief figure in a demonstration by 5,000 persons in Paris. Forbidden by authorities to stage any demonstration within the city, the crowd marched through Bois de Vincennes, carrying red flags and banners. Some slogans were orated destroyed because they were considered insulting to the United States.

Demonstrations in London. Several thousand Sacco-Vanzetti sympathizers marched to the American Embassy in London to protest against the sentence. A world war veteran led the column, seated in a copy of an electric chair and wearing a black cap over his face. "Save Sacco and Vanzetti from the electric chair" one banner said.

Railroad workers and shop employees joined a widespread labor stoppage in Buenos Aires and two new groups were called out for tomorrow.

Twenty were arrested as police dispersed a crowd of communists in front of the American Consulate in Munich.

Police of Stockholm, Sweden, said they would permit meetings of Sacco-Vanzetti sympathizers but forbade them to enter the property of the United States Legation.

Scattered activities against the sentence of the two men were reported in the United States.

Extra police guards remained on duty in Philadelphia while investigation was continued into the explosion that wrecked Emanuel Presbyterian church there Friday night.

Miners Asked to Strike. A circular calling for a one-day protest strike was distributed among the United Mine Workers of America at Wilkes Barre, Pa.

Union officials said distribution was not sanctioned by their organizations.

Three men and a woman were arrested and thousands of alleged communistic papers were seized in Los Angeles.

Although order marked meetings of the Sacco-Vanzetti sympathizers in Chicago, police said they had 35 radical leaders under surveillance and were guarding eight prominent public officials' homes.

Defense attorneys addressed a crowd of about 700 in the rear of the city hall at Worcester, Mass., home of Judge Webster Thayer, trial judge in the case. There was no disorder.

Several arrests for distribution of literature, one piece of which derided "the bloody decision of Governor Fuller" as "a challenge to labor in the entire world," were made in New Haven, Conn.

Wealthy Radical Will Go to Jail

By Associated Press.

Boston, Aug. 8.—Edward Holton James, wealthy radical, today was sentenced to serve 90 days in jail on charges of inciting the riot and assaulting a policeman during a Sacco-Vanzetti demonstration on Boston Common yesterday. James took the prison sentence rather than pay fines totalling \$75 imposed by the court.

When arraigned before Judge Dowd in District Court James declared he refused to recognize the court's jurisdiction. He refused to rise for the reading of the complaint against him, saying he would not stand up "before murderers, whether they are judges, police officers or governors."

After reading of the complaints he declined to plea. He was fined \$50 on the charge of inciting the riot and \$25 on the assault charge.

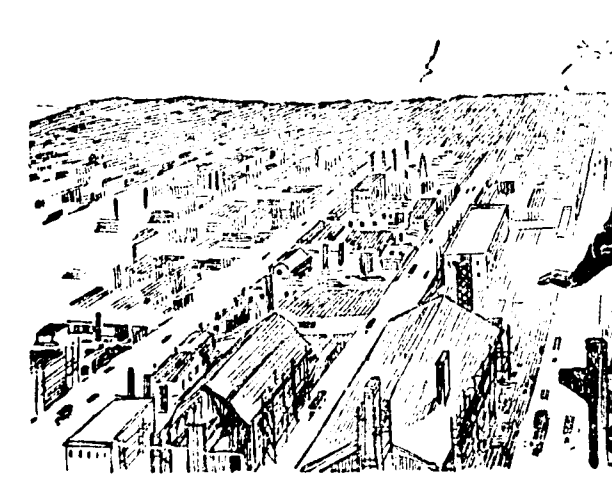

He asked the court how much

the fines would mean in the form of a prison sentence, and when informed said he would take the 90 days.

Colorado Miners Strike in Sympathy

By Associated Press.

Denver, Aug. 8. Approximately 1,000 coal miners in Pueblo county, near Waldenburg, went on a strike today in protest against sentencing to death Sacco and Vanzetti. Massachusetts radicals, according to early estimates, by officials of the Colorado Fuel and Iron Company in the Trinidad district in Las Animas county most mines reported a few out as a result of the strike, except at Tellerburg, where a large number of miners were idle.

EUROPEAN FLYERS READY TO HOP OFF FOR UNITED STATES

By Associated Press.

Lupion, Aug. 8. Reports of improved weather conditions over the Atlantic had European transatlantic flight aspirants in buoyant mood today and the present week may see a veritable race for the honor of being the first to cross the ocean westward to the American continent.

A half dozen expeditions—three German, two French and a British—are ready or very nearly ready for the take-off when the weather men announces the exact conditions for flight.

There is also the Bollata plane, Columbia, which Charles A. Levine, its owner, has been preparing for a return flight to New York.

Captain F. T. Courtney, who will seek the honor for Great Britain, after a test flight in his "Whale" yesterday, pronounced the general behavior of the flying boat satisfactory.

Two junkies' planes, the "Europa" and "Bremen"—which will represent Germany in the transatlantic effort—are represented in Atlantic dispatches to be undergoing slight technical alterations, which it is hoped will be completed by Thursday. The Europa plane, which last week broke the American endurance record will be piloted across the water by Cornelius Edvard and Johann Ristow. The Bremen will be in the hands of Herman Koehl and Friedrich Loose.

Lieutenant Otto Kochen, who will pilot the third German plane, a Caspar machine, has announced his intention of getting away before Wednesday. There will be a passenger on each of the German expeditions.

Paris reports that the French are pinning their hopes on the Farman plane "Blue Bird" and the Breguet

PETITIONS DENIED BY JUSTICE BEHALF SACCO AND VANZETTI

By Associated Press.
Dedham, Mass., Aug. 8.—Judge Webster Thayer of the Massachusetts Superior Court, late today denied the motion of counsel for Nicola Sacco and Bartolomeo Vanzetti for a new trial. He based his decision on the grounds of lack of jurisdiction.

By Associated Press.
Boston, August 8.—Justice Sanderson of the State Supreme Court today denied petitions by Counsel for Nicola Sacco and Bartolomeo Vanzetti for a writ of habeas corpus and stay of execution. He also denied a petition for a writ of error.

Justice Sanderson said that after giving the arguments all consideration he must deny the application for a writ of error.

"This court, he continued, 'has no authority to grant a stay of sentence.'

"The question included in the petition for a writ of habeas corpus are not proper to an action for a writ of habeas corpus and are therefore dismissed."

Arthur D. Hill, chief of counsel for the condemned men, had addressed the court for more than an hour. He devoted his argument largely to allegations of prejudice on the part of Judge Webster Thayer of the Superior Court, who presided at the trial and whose refusal to grant a new trial was upheld by the Supreme Court.

Judge Thayer to Hear Motions

By Associated Press.
Dedham, Mass., Aug. 8.—The Norfolk county court house, scene of many previous momentous steps in the Sacco-Vanzetti case, saw a new phase of the seven year legal proceedings this afternoon. Judge Webster Thayer of the Superior Court, who presided at the trial here which resulted in the conviction of Nicola Sacco and Bartolomeo Vanzetti for murder and who in the same court room last April sentenced them to death after the Supreme Court had upheld his refusal to grant them a new trial, came here from his vacation at Ogunquit, Maine, to hear a new motion for another trial and for a stay of execution.

GRAIN QUOTATIONS SOARED MONDAY ON REPORTS OF FROST

By Associated Press.
Chicago, August 8.—All grain prices were soaring today, largely on account of reports of serious crop damage by frost in Canada. Approaching the close of the business for the day wheat quotations were up six cents a bushel and corn more than 4c with all deliveries of corn touching the highest levels yet this season.

Waves of buying orders began to hoist grain values almost from the outset, but confirmation of the damage to crops by frost was not readily available. Later, however, advice was received purporting to show that frost damage was serious in the districts of Assiniboia, Gravelburg, Rosemont and southwest and Regina and south-east.

Later advice here were that ice a quarter inch thick had formed at Gravelburg. Other reports said that temperatures in some places reached as low as 22 in Swift Current territory.

Rye and oats as well as wheat and corn were affected by the frost. Rye bulge in prices. At the top, rye was up about 4c a bushel and oats 2.1-2c.

Wheat and Corn Jump Kansas City

By Associated Press.
Kansas City, Aug. 8.—Responding to reports of frost in Canada, wheat futures prices jumped sharply upward here today, making advances of 4.4 to 5.1c with September delivery selling at 134.1-2. The close was a little under the high for the day.

Corn futures prices also soared as a result of unfavorable crop reports. Prices advanced 3.1-3 to 4.1-2 cents. September selling up to 107.1-2. More than a cent of this was lost at the close, however.

Sidewalks Rose In Air Says Witness

By Associated Press.
New York, Aug. 6.—An eye witness today described how "sidewalks rose in the air" under the blasts of the subway bomb explosions.

Captain William A. McIntyre of the 68th Infantry, with two companions, was walking in 28th Street, near Fourth Avenue, when the explosion occurred.

"The sidewalks actually rose in the air," he said, "and we ran to the subway under a shower of falling glass from windows two stories above the street."

General Strike In Buenos Aires

By Associated Press.
Buenos Aires, Aug. 8.—The police of Rosario are said to be in readiness to cope with any emergency.

A general strike lasting 45 hours was called to begin today by the Syndical Union of Argentina, the most important labor organization, as a protest against Governor Fuller's decision.

INFORMATION ON TAX MATTERS LAID BEFORE COMMISSION

By Associated Press.
Austin, Texas, Aug. 8.—One third of corporations doing business in Fort Worth and Dallas are not even on tax lists. Senator Edgar Witt of Waco reported today to his colleagues of the State Tax Survey Commission, created by legislative resolution to study the state's tax system with a view of readjusting the burdens.

Former Governor O. B. Colquitt, Dallas, chairman of the commission, in a report on what he termed "glaring inequalities" showed that five public utility corporations of Dallas with total earnings basis value of nearly \$52,000,000 were assessed on valuations of only about \$11,000,000 for state and county purposes, and \$18,000,000 in 1926 and \$18,000,000 for city purposes in 1927.

"That's the way things are going now in this country," he said. "The home owners pay the cost of operating the street lighting system, the light and power systems, and the gas companies. It all comes out of the home owner's pocket."

By Associated Press.
Austin, Texas, Aug. 8.—Information on tax matters secured from county officials, corporations and other States was laid before the State Tax Survey Commission today by its members, who have been assigned to study of various tax subjects with a view of evolving a better system for Texas.

Headed by Governor Oscar B. Colquitt of Dallas, chairman, the Commission convened at 10 a. m. for a renewed inventory of its progress. Nine of the 15 members were present and others expected.

DOCTOR AND WOMAN HAVE LOST MUCH OF AIR OF BRAVADO

By Associated Press.
Franklin, La., Aug. 8.—Counsel for Mrs. Ada Lehouef and Dr. Thomas Dreher, sentenced Saturday to be hanged for the murder of James Lehouef near Morgan City July 1, were prepared today to fight for their clients' lives on the grounds that the jury which convicted them was "packed."

James R. Perkerson, chief counsel, declared that he had obtained affidavits from men who swear in effect that they would hang Mrs. Lehouef and Dr. Dreher if they were selected for jury service.

Counsel for James Beadle, who was given life imprisonment as the third member of the trio convicted Saturday had made no statement.

Showing little emotion at the verdict that would send her to the gallows which can be seen from her cell, Mrs. Lehouef has finally collapsed. Dr. Dreher lost his cool impassively.

He seems to have aged ten years since he heard the jury tell him in effect that they did not believe his story that Beadle slew Lehouef after the victim shot first.

Only Beadle has remained the same. Taken to his cell after the reading of the verdict while his wife was led from the court room, the trapper removed his clothes and went to bed. He stated Saturday night that he only desired to see his hound dogs before going to the penitentiary for the rest of his days.

Court House Items of Interest From Temple of Justice.

District Court.
This is the last week of the July term of the Thirteenth Judicial District Court.

Saturday afternoon, Hawkins Scarborough, district judge, dismissed 135 divorce cases pending on the docket. The cases were old and in many instances, reconciliations had been effected, one or more of the principals had moved away or died and various other reasons deferred the trial of the cases.

The Navarro county grand jury which had been in recess for several days, resumed its deliberations Monday morning.

A jury commission composed of Rowland Mays, Kerens, S. H. Garrett, Embrose and J. M. Rugh, Corsicana, met Monday as a jury commission to select grand jury and petit jury lists for the October term of the district court.

PREVENTION OF DISEASE

(Clippings from Hygea published by the American Medical Association and furnished the Daily Sun by the Navarro County Medical Association.)

Nervous Child Prone To Have Compulsions

Some of the more familiar forms of compulsions are walking only on the lines of the sidewalk, or only on the squares, performing each act a certain number of times; washing the hands or brushing the teeth a certain way or a given number of times; reading every word of a billboard; repeating a prayer or a statement many times in an effort to make it absolutely accurate.

Parents should be on the watch for these compulsions, so they may be checked before they reach such proportions that the children suffer under them, advises Dr. Frank Howland Richardson of Hygea. Children are often inarticulate about compulsions and adults must keep a sharp watch to discover them in the early stage. Once discovered, the adult should enter into them as if they were something to be enjoyed or laughed at with the child. This, of course, is quite different from laughing at him.

Such an attitude of frankness and understanding will do much to clear up the compulsion, for one compulsion is lost, to be followed by another. The underlying causative condition of the nervousness that forms a basis for these manifestations must be cleared.

Art of Dining is Lost in the Strenuous Age

Man in the Stone Age was in greater danger from the tiger than from sedentary habits and the dining table, declares Dr. J. Howard Beard in the August Hygea. A few decades ago, civilization had progressed to the stage where eating was considered a high art. Now in the Strenuous Age it becomes a necessary time-consuming evil.

Machinery, including the limousine, the mania for speed and the habit of combining business with luncheons and dinners is having a disastrous effect on modern man's digestion. Meals should be eaten quietly, unhurriedly, in a calm, pleasant atmosphere, free from the cares of business or household. Food must be discarded its present substandard ideal of a sandwich in one hand, a cup of coffee in the other, and an eye on the clock. In filling a cafeteria tray, one should not permit the subtle methods of salesmanship to serve profits rather than nutrition, warns Dr. Beard.

RETAIL BUSINESS GOOD AT PRESENT SAYS PENNEY MAN

"Good roads development, the automobile, bus lines and other elements adding to the ease with which people may travel is a boon for all local merchants," says Clyde Foster, manager of the J. C. Penney store in this city.

This is clearly shown in the volume of business that is being done at retail at the present time, especially in such necessities as dry goods and other department store merchandise.

The store keeper who is on the watch for new customers can get them in steadily increasing numbers. This is clearly shown by the increase in business done by the J. C. Penney stores in the past six months over the same period of last year. This increase amounts to \$12,637,692 and is the largest increase shown by any large store operating company.

"New customers are coming into every town in the country, brought by motor cars and trains. They are buying over the counter at a greater rate than ever before and they are showing excellent judgment in their selections of materials and styles."

The constant migration of families by motor car, the influx of tourists and the general movement of the population of the country is also affording the local merchants a rare chance for increasing sales volume.

"Advertising, cooperation with customers, attractive store fronts and the faculty of being wide awake to the new business conditions which modern transportation has created will serve to make any well-organized community a better place in which to do business than ever before."

The time is ripe for local business clubs and organizations to popularize their respective cities by furnishing attractions and conveniences which will bring the traveling population into the business districts.

Rochester Grocery Store is Wrecked

By Associated Press.
Rochester, N. Y., Aug. 6.—Explosion of a bomb left on the threshold of the grocery store operated by Herman Difabio and Herman Guttli in Roman Street wrecked the building, scattering windows within a radius of three blocks, and rocked that section of the city, this morning.

Both Difabio and Guttli, when questioned by police, maintained that they had no enemies and had received no threats. Neighbors declared this to be the third attempt in six years to wreck the building.

GOVERNMENT REPORT GIVES INFORMATION ON WEEVIL AND OTHER COTTON INSECTS

Special to the Sun.
Tallulah, La., Aug. 5.—The following, which is the ninth of the series of reports being issued monthly for the season of 1927, includes such reports as are available on cotton insects in the field.

Reports on the Boll Weevil.
College Station, Texas, F. L. Thomas, July 21.—Boll-weevil dusting by airplane is still going on in the Brazos Valley, some plantations just beginning to receive the first application. Infestation at 50 points averaged 16 per cent.

K. P. Ewing, July 13.—In the vicinity of Tyler, Texas, a total of 1,000 squares were examined in 5 fields. The weevil infestation ranged from 5 to 27 per cent. At Wilbarger Point, Texas, a total of 1,200 squares were examined in 5 fields. The infestation ranged from 2 to 9.5 per cent, the average being 4.1 per cent. At Dallas, Texas, a total of 1,400 squares were examined in 5 fields. The range of infestation was from 1 to 7.6 per cent, the average being 3.8 per cent.

Baton Rouge, W. E. Hinds, July 14.—Boll-weevil occurrence in the central and southern parts of the State seems to be decidedly "spotted" as we anticipated that it would be on account of cotton leaf-worm stripping conditions last fall. At Baton Rouge the weevil infestation generally low but is higher in certain small areas close to favorable hibernation shelter. Three applications of dust have already been given on the station cut and dusting seems to be increasing generally among the planters in the southern part of the State.

Tallulah, La.—From July 11 to 16 square examinations were made in 7 fields of old cotton, an average infestation of 18.5 per cent being found. The range was from 2.0 to 61.0 per cent.

A. and M. College, Miss. Miss. State Plant Board, July 13.—Boll weevils in Mississippi are nearly four times as numerous now as at this time last year, and pointing to the fact that every hill country from the Tennessee line to the Gulf, declares the State Plant Board in reporting investigations by its inspectors on 95 farms in 22 counties during the past week. Weevils were present in every county with an average infestation of over 11 per cent on all the farms examined, as compared with an average of only 3 per cent on this date last year.

Auburn, Ala., J. M. Robinson, During the first half of July the boll weevil multiplied in large numbers. Out of 23,735 squares examined on all the experimental plots 1,093 were punctured. The infestation in all plots averaged 12.2 per cent. Of the 2,450 squares examined during the week of July 11 to 16, 1,438 were punctured. This gives an infestation of 18.3 per cent. The infestation of boll weevils is increasing gradually on the test plots here at Auburn.

Florence, S. C., E. W. Dunnam, July 16.—From July 11 to 16, 1,438 squares were examined. The infestation of boll weevils is increasing gradually on the test plots here at Auburn.

Clemson College, S. C., C. O. Eddy, July 19.—Boll weevil in the Piedmont section of South Carolina is light and scattered.

Raleigh, N. C., R. W. Leiby, July 15.—The boll weevil is quite active in the southern counties of the State. In many fields from 4 to 10 squares are punctured on many stalks. First-generation weevils began emerging July 8. It now appears that fields will be generally infested by July 25 to the point where control by poisoning will be advisable. In the upper coastal plain and lower Piedmont sections infestation is not so severe at present.

Reports on Cotton Flea Hopper.
Dallas, Texas, K. P. Ewing, July 13.—Very few cotton flea hoppers were found in cotton at Dallas, Tyler, or Willis Point, Texas. Practically no damage has occurred at any of the points, and only a scattering few specimens have been taken from cotton by sweepings.

Baton Rouge, La., H. E. Hinds, July 14.—No complaints as yet from cotton flea hoppers in this section.

Auburn, Ala., J. M. Robinson, July 15.—The cotton flea hopper has not appeared in large numbers this year.

Florence, S. C., E. W. Dunnam, July 15.—No complaints of cotton flea hopper damage has been received.

Clemson College, S. C., C. I. Eddy, July 19.—Cotton flea hoppers are developing in moderate numbers on cotton. Very few are to be found on cotton and injury is negligible. Evening primrose is maturing and dying rapidly.

Raleigh, N. C., R. W. Leiby, July 15.—The cotton flea hopper is not injurious at present.

Miscellaneous.
College Station, Texas, F. L. Thomas, July 19.—The leaf-worm infestation this year seems to be quite different than usual, definite records coming from widely separated localities as a result of the occurrence of only a few individuals. The following counties reporting presence of worms or a worm or moth: Nueces, Live Oak, Bastrop, Travis, Burleson, Robertson, Hill and Grimes.

Tallulah, La., July 26.—Leaf worms are defoliating cotton in scattered areas in Texas to the northern boundary and in northwestern Louisiana.

Baton Rouge, La., W. E. Hinds, July 14.—I have no positive evidence of leaf-worm occurrence but

we have had rumors of such occurrence between Baton Rouge and New Orleans. Several complaints of red spiders causing a rusty appearance of cotton foliage have been received and some sulphur dusting has been done for this pest.

Raleigh, N. C., R. W. Leiby, July 15.—Reports of injury from the red spider are spotted and are coming in faster and earlier than last year.

we have had rumors of such occurrence between Baton Rouge and New Orleans. Several complaints of red spiders causing a rusty appearance of cotton foliage have been received and some sulphur dusting has been done for this pest.

ANNUAL FARMERS SHORT COURSE ONE MOST SUCCESSFUL

Special to the Sun.
College Station, Texas, Aug. 5.—"The Eighteenth Annual Farmers' Short Course, July 25-30, has passed into history, but it made an impression on more than four thousand farm men, women, girls and boys which should mean much to the future of each community, the state, and the nation," said President T. O. Walton of the A. & M. College, in commenting on the success of the short course.

"These people were serious and earnest, and partook of the educational programs prepared for them in a manner which speaks well for improved farm and home conditions. As a class these farm people look upon the training of the head, heart, and hand as a medium of preparing them for greater efficiency in service to the home, community, and humanity; and they must perforce be the leaders and the trained followers of the future, as contrasted with those who look upon education as a means of escaping arduous labor."

Charles H. Alvord, director of the Extension Service and the Farmers' Short Course, was also well pleased with the results of the course this year. "Each year, as the Short Course program develops, we come to a realization of its growing importance to the people of the state," he said. "These people come from every section of the state, bringing with them helpful suggestions concerning the agricultural programs they are developing in their respective communities, and from this interchange of suggestions they will carry home each year a broader vision and outlook on the great possibilities of the development of the resources and expansion of the opportunities for Texas people and those from other sections of the nation, who may choose to locate here. This meeting was entirely free from propaganda of any kind and represents an earnest desire on the part of the people to increase their knowledge through the various programs presented. The people are recognizing more and more the leadership of the A. & M. College in the agricultural affairs of the state, and seem more than anxious to join the College in a conservative program for the improvement of farm and home conditions."

H. H. Williamson, State Farm Demonstration agent, Miss Mildred Horton, state home demonstration agent, and Sterling C. Evans, state club leader, were the principal agents of the College of field agents, enthusiastic over the results of the short course program and pronounced it the best in the history of the college, while those who mingled in the throng declare that this was the universal sentiment of those familiar with short course work.

Over sixteen hundred farm boys and girls took an active interest in the educational programs presented, and many were prize winners. These club members were the representative club members from their respective communities and carried these trips through a competitive effort. They will carry back to more than twenty-five thousand club members in the various counties of Texas the benefits of the training and inspiration they received at the short course, thus rekindling and keeping alive the home fires of farm and home improvement.

The attendance this year taxed the capacity of the college. In order, arrangements are being made to build additional dormitories on the campus which will increase the capacity to care for an even larger crowd next year.

Believed New Attempt On Frisco Church

By Associated Press.
San Francisco, Aug. 6.—The Catholic church of Saints Peter and Paul in the Latin quarter here, against which bombing attempts have been made five times in a little more than a year, was under heavy police guard today in the belief that dynamite was planning a sixth attempt to blow up the edifice.

The alarm was spread after a group of boys reported to Father Patrick that they heard men running on the roof and later saw the intruders fleeing down a fire escape. In a lot of the church, which priests said had been supposedly empty for some time, police found men's tracks in the dust.

Suggestion that the suspected bomb plot might have formed by Sacco-Vanzetti sympathizers was considered "far-fetched" by the police.

You Can Get It In Corsicana

ATTEMPT MADE TO DYNAMITE HOME OF BALTIMORE MAYOR

By Associated Press.
There was a series of bomb explosions in the United States and South America over night. No evidence was made public to show that there was connection between the bombings and the Sacco-Vanzetti case, but in New York, two subway stations were bombed, police and transit officials were quoted as believing Sacco-Vanzetti sympathizers to be responsible.

When the subway stations were bombed shortly before midnight a score of persons were injured by the explosions. Police were assigned today to all subway stations departmental vacations were cancelled and the homes of the mayor and city hall, St. Patrick's Cathedral and the homes and offices of many other prominent men were guarded.

Baltimore Mayor's Home Bombed.
At Baltimore a bomb was exploded under the porch of Mayor William F. Broening. The mayor was not at home, but Mrs. Broening and their children were. No one was injured.

In Philadelphia, Emmanuel Presbyterian Church was badly damaged by a bomb that exploded in basement. No one was injured, but the neighborhood was rocked and windows in nearby houses were broken.

In Buenos Aires, Argentina, a general strike, called to protest the execution of Sacco and Vanzetti, was marked by disorder and the explosion of two bombs. Discharges from Pergamino said a bomb had been exploded in a Ford automobile agency and a railroad there. Demonstrations caused many business houses to close in the interior.

Ask Coolidge to Interfere.
Communists made a hostile demonstration before the house of the American Consul at Lille, France. The mayor of Lille has appealed to President Coolidge to grant clemency to Sacco-Vanzetti.

At Cambridge, Mass., police were investigating the firing of a fusillade of shots at the East Cambridge District Court house. The shots were fired during the night from a speeding automobile.

Boston, like New York, was being guarded by extra police details. Patrolmen stood alert at vantage points in the business district and paced elevated platforms.

By Associated Press.
Baltimore, Aug. 6.—An attempt was made to blow up the home of Mayor William F. Broening in Northwest Baltimore by a bomb this morning. The house was set on fire and firemen found another bomb in the dwelling.

The terrific explosion shook the entire section. The house was slightly damaged by fire. Mayor Broening was absent from the city. His wife, son and daughter, remaining members of the family were in the house. The bomb exploded under the back porch which was demolished.

Mrs. Broening was awakened about 2 a. m. by noises which she thought were caused by burglars. She telephoned for police. Three officers responded and searched the neighborhood without discovering anything unusual. They were still in the vicinity when the explosion occurred about six o'clock.

A chandelier and windows in the house directly across from Mayor Broening's on a side street were shattered by the explosion. Police early in the day advanced no theory as to the motive for the outrage.

Mayor Broening Returning Home

By Associated Press.
Cincinnati, O., Aug. 6.—Shirtless and half shaven, Mayor F. Broening of Baltimore made his way hurriedly from a western train to his home in Baltimore and Eastbound one at Winton Place on the outskirts of Cincinnati today when informed that an attempt had been made to blow up his home with a bomb.

His journey to St. Louis and Fort Worth, Texas was cut short by the news of the explosion. "I have no idea why my home was bombed," he said. "I was elected by a nice majority in a campaign which was not at all bitter. I have no personal enemies who would commit such an outrage."

CHURCH WRECKED BY BOMB PHILADELPHIA; NO REASON KNOWN

By Associated Press.
Philadelphia, August 6.—Emmanuel Presbyterian church was badly damaged early today by an explosion which shattered the basement windows. No one was hurt.

The Rev. Edward S. Bowman, pastor of the church, is out of the city. Neither members of his congregation nor his wife could offer an explanation of the explosion.

Mrs. Bowman said her husband had never discussed radical activities from the pulpit and that there was no discussion in the church.

The explosion tore a big hole in the side of the building near the basement and shattered all its windows. Buildings for blocks around were shaken and the blast was heard throughout West Philadelphia.

The explosion occurred shortly after midnight and there was no one in the church. An unexploded can of nitro glycerine with a wire

THRILLING BATTLE BETWEEN RUM RUNNERS AND GUARDSMEN NEAR BAHAMA ISLANDS SUNDAY

By Associated Press.
Fort Lauderdale, Fla., Aug. 8.—A thrilling battle between Coast Guardsmen and alleged rum runners on the high seas near the Western fringes of the Bahama Islands, claimed the lives of two government agents yesterday and sent four other participants to a hospital here, where the condition of three was reported serious.

The dead:
ROBERT K. WEBSTER, 48, Atlanta, government secret service operative.

SIDNEY SANDERLIN, Virginia Beach, Va., Coast Guard boatswain's mate.

The wounded:
Victor A. Lambly, Coast Guard motor machinist's mate; Jodie L. Hollingsworth, Coast Guard seaman, second class; Robert E. Weech, Miami, alleged rum runner; Horace Alderman, Miami, alleged rum runner.

Battle Late Sunday.
The fight occurred late yesterday about 40 miles east of Fort Lauderdale, when Coast Guard patrol boat, 249, found the Bahama, a small boat, heading toward Miami.

A command from Coast Guardsmen to stop went unheeded and a shot across the craft's bow failed to halt the motorboat, whose engine stalled a few moments later.

Maneuvering into position, with the forward gun trained on the captured boat, Coast Guardsmen in their launch transferred Alderman, Weech and three other men found on the craft to the patrol boat, where they were corralled as prisoners and searched. In the meanwhile four Guardsmen, including Sanderlin, returned to the motorboat to transfer 160 cases of liquor reported found.

Rum Runner Starts Battle.
When Lambly entered the patrol boat's pilot house Alderman seized a weapon and shot the machinist's mate, according to other Coast Guardsmen. Alderman was said to have assumed command of the situation for the moment and ordered Weech to tear out the engine room plume, this instruction being carried out.

Webster, standing apart from the group at the pilot house, rushed toward Lambly and was dropped in his tracks under the blazing gun fire from Alderman, according to the Guardsmen aboard the captured boat, who hurriedly prepared to shove off in their launch to effect a final surrender of the alleged rum runner.

Alderman was said to have shot and instantly killed Sanderlin as the launch turned about and headed back across the narrow stretch of water separating the two boats. Boarding their own craft with difficulty, the Guardsmen in a lively free-for-all melee interspersed with shots, soon overpowered their opponents. The wounded were brought here aboard a fast motorboat, one among several which went to the government boat's aid.

PRESIDENT COOLIDGE GIVES NEW EVIDENCE HE WILL NOT BE PRESIDENTIAL CANDIDATE

By Associated Press.
Rapid City, S. D., Aug. 6.—Somewhere a job is waiting for President Coolidge. He hasn't the slightest idea what kind of a job it is, and he isn't worrying himself much about it.

Some one has suggested to the President that if his recent statement declaring he did not choose to run for re-election in 1928 really meant his retirement from the White House he would need to be looking around for something to do after March 4, 1929, and Mr. Coolidge emphasized that that was correct.

But he has let it be known that work has never found any difficulty in coming his way and he believes it likely will continue to find him easily after he leaves the White House.

Thus the President has given notice to the country that he has no intention of running

GLAD FEET

MAKE YOU EASY TO LIVE WITH

Sad feet are responsible for much unhappiness both to their owner and to others. They even contribute their part toward filling the docket of divorce courts.

Sad feet may be transformed into glad feet with proper treatment and one of the best helps is—

A. D. S. FOOT SOAP

Some of its glad making ingredients are Iodine, Eucalyptus, Borax, Olive Oil and Bran. This soap with proper support and treatment, that we will suggest, enables you to go through the Summer with Much More Foot Comfort. Price 25c.

Williams Drug Company

Motorcycle Delivery — Phones 105 and 106
108 South Beaton Street

We have about 15 or 20 Portable Victrola machines that will be sold at a big reduction. Have bargains in everything musical; some slightly used machines that will be sold for one-half their real worth. Now is the time to get real bargains, for we need the money.

Will make terms if you wish.

COMMENT OF LEADING PAPERS NORTH AND EAST ON RECENT ALL-TEXAS SPECIAL RESULTS

Special to the Sun.
Fort Worth, Texas, Aug. 8.—That the eyes of the country are turning towards Texas as a result of the All-Texas Special Good Will Tour, which visited fourteen of the large cities of the North and East during the month of June, is being abundantly shown by recent comment by newspapers and other publications and by letters received by the All-Texas Ways and Means Committee from those sections.

"New England has been given a better idea of Texas and Texans," writes George H. Clifford, native Texan who is now a citizen of Boston, and adds that he has received many inquiries from investment houses about this State since the visit of the All-Texas party. The New York Sun, according to New York Sun, has served to bring the metropolis and Texas closer together, and the New York Graphic declares that such enterprises serve to "make a more united nation of the United States." The Graphic suggests that a party of New Yorkers should tour Texas. "Such visits are productive of great good," says the Graphic. "They establish friendly relationships in business as well as in a purely social way. They help one part of the country to recognize the problems and the ambitions of other parts."

New York Sun Comments
"Perhaps," says the New York Sun, "the chief bond of affinity between New York and Texas is a common restlessness—a common inclination to be content with things as they are. New York can understand a State which makes a seaport out of an inland city like Houston, causes Uncle Sam to create harbors at Point Isabel and Corpus Christi, turns the desert of the lower Rio Grande Valley into a fertile and fecund garden, replaces the longhorn of the plains with fine beef cattle which can hold their own in the Kansas City and Chicago markets, pumps oceans of oil from its lands, endows its State university with one of the nation's finest libraries, fosters county farm agents and practices crop diversification while maintaining the hegemony of King Cotton."

The Boston Herald points out that Texas is on the way to become the most populous State in the Union. "Do we New Englanders realize," it asks, "that Texas—whose Governor has recently been visiting us—while universally known as the largest state in the Union, stands a good chance of becoming the most populous, too? Watch the trend in the assignment of seats that followed the admission of Texas into the Union, and for the whole decade that followed, Texas had just two congressional districts, based upon population, as against thirty-four in New York. Roughly speaking, Texas was one-seventeenth as populous. By the civil war census of 1860, Texas came to the front with four congressional districts, against thirty-one in New York. A little more than one-eighth as populous. The next census stood five Texans to thirty-three New Yorkers, a little better than one-sixth. The decade of the eighties gave Texas 11 to New York's 34, close to one-third; the next census stood 13 Texans to 34 New Yorkers. Then came 16 Texans to 37 New Yorkers. Now it's 18 Texans seats to 43 for New York. The disparity in area is so great as to give Texas a wonderful opportunity. It has 265,000 square miles against New York's 49,000. If Texas were one-fifth as thickly settled as New York per square mile, it would have the larger population. Is that ratio impossible of achievement? The Texans say No!"

The New York Times remarks that the object of the All-Texas Special Good Will Tour was "to acquaint financial and manufacturing centers of the East with the imperial resources of Texas and to stress the interdependence which is so obvious that it is often forgotten." Commenting it continues: "The trade balance of the Union is so obvious that it is often forgotten. Texas could not be so great as it is without Texas, nor could Texas realize its commercial importance without New York. The more that is done to emphasize and clarify the relationship the better for the two American empires."

American Praises Texas
"Northern capital," exclaims the New York American, in an editorial which appeared in all Hearst newspapers throughout the country, "is just learning the opportunities to manufacture raw materials where they are grown." "It would be a good thing for the country," it continues, "if the investment bankers could be induced to visualize the wonderful resources of Texas. There they would find in a single State an empire greater in area than Germany before the war, sheared her, and infinitely richer in natural resources. There they would find five million all-American people, a blend of the South the stock that wrested the republic of Texas from Mexico, and immigration from the mid-West. It is a race and an environment to produce independence, industry, vision. Perhaps no State in the Union has so many strings to its bow as Texas. She leads all States in cotton, wool, livestock and oil. Her known oil deposits are so huge that they exceed all calculations, and it controlled will develop an eleven billion dollar oil industry. The State raises every known agricultural product of the country, from winter wheat on the wind-swept

plains to semi-tropical fruits and grains in the irrigated delta of the Rio Grande, lying in the latitude of Miami. Northern capital is just learning the opportunities to manufacture these raw materials where they are grown. Flour mills, meat products, refineries, leather goods, and above all, cotton and woolen goods beckon to it with abounding opportunities. "When will the East get over its fond illusion that Texas is still a State of cowboys, stud poker and bandits?" asks the New York Telegram. "As Governor Moody told Boston Newspapers, if they were to fall asleep in their own town and wake up tomorrow in Dallas, Houston or any other large Texas city, they would find themselves that they were accustomed to see. He might have added that the buildings would have a less dingy appearance, that the streets would be cleaner, that ordinary people would be living more luxuriously in bungalows on fifty-foot lots instead of dark tenements, that Houston is passing Boston as a port, though she had to dig her harbor, and that more money is being spent for electrical development in Texas right now than in all the New England States put together."

Transition of Texas Told.
Remarking on the transition of Texas from a purely livestock and agricultural state to a place where it is turning toward industrial pursuits as well, the St. Louis Globe-Democrat points out that capital is now welcomed into the State. "For a long time," says the Globe-Democrat, "Texas' unfriendly attitude toward foreign capital has been a myth. And it was to dispel this myth that the forward-looking young Governor and his business associates set forth into other states to court useful capital and the business good will of the nation. That the delegation has done what it set forth to do is evidenced by the reception and encouragement the members were given in St. Louis and other cities of the tour. Agriculture is doing well in Texas. Range lands, especially in the more remote regions, have been and are being cut up into smaller tracts for the plow, and diversified farming is laying a \$1,000,000,000 tribute at the feet of the citizens of the state annually. Now to balance this the business men of the commonwealth want increased industrial interests. There seems reason why the desire should be denied; especially in the face of

the presentation laid before the outside interests by Governor Moody and his equally progressive and business-like associates." "Texas alone, intensively cultivated," exclaims Arthur Brisbane in his column which is printed in hundreds of newspapers, "could feed every one of the 1,900,000,000 human beings on earth and have room left to raise cotton." And he Syracuse, N. Y. Herald, points out that there are many reasons why Texas and New York should get closer together. "One of them," says, "is the richest and most populous of the Union—the leader in finance and industry. There is the biggest in territory and agricultural output. Every school boy is familiar with the primacy of Texas in the matter of size, but few of us realize her pre-eminence in the production of the necessities of life. From the latest official statistics at hand, those for the year 1925, it is seen that Texas leads all other states in the total value of her agricultural yield and her animal products. The figure for the former was \$637,000,000, and for the latter \$308,000,000—or within striking distance of a round billion dollars." The State Fair at Dallas is, by the way, a two-week enterprise, though its duration comes far from connoting the wonderful industry it represents. It is few New York is the greatest workshop and financial and commercial mart, Texas can claim similar primacy as the American garden and ranch. Nay more, if Texas is the unequalled producer of food and cotton, New York is the unrivaled consumer of both."

Two Big to Be Misunderstood
Texas, remarks the Springfield, Mass., Union, "is too big to be misunderstood very long. Most Easterners know by this time that it is achieving one record after another. We have read claims about its primacy in mules, peanuts, cotton, petroleum, sweet potatoes, and heavens knows what else. We know that it is not only our biggest State in area, but first in value of farm products, second in export trade, and climbing up the population ladder in a way to frighten Ohio and Illinois. We know that it has one of the richest and sturdiest of state universities. Many of us have learned the proper pronunciation of 'Houston'."

The Evening Bulletin of Philadelphia takes occasion to call attention to the fact that Pennsylvania and Texas are directly connected by water transportation. "Galveston and the Delaware Breakwater," points out the Bulletin, "are only a short voyage apart. No two States are more complementary than Pennsylvania and Texas. Vast quantities of oil products, cotton, vegetables, fruits and packing house products originating in Texas reach refineries, textile mills and the tables of Philadelphia. Philadelphia's famous locomotives, steel iron, machinery, silks, linens, hosiery, worsted and other products find a market in turn down by the Rio Grande."

Pretty nearly everything the people of Texas need to buy outside their own State is to be had right here. The Texas executive is making friends in the East."

Old Ideas Dispelled
The Boston Evening Transcript, one of the oldest newspapers in New England, remarks on the fact that the visit of the Texans did much to disabuse the popular idea that the people of Texas were cowboys and frontiersmen. "President Coolidge told some people in South Dakota the other day that they were very much like Vermonters," says the Transcript. "These visitors from Texas gave evidence that the people of their State are very much like the people of New England. There is marked family resemblance in dress, manners and tastes. They come from the same kind of homes. They do business in the same sort of buildings, save that in Texas the law permits taller structures than are permissible in Boston. If the Texas of the days of the covered wagon has not been as completely relegated as the Massachusetts of the era of Indian wars, it is fast approaching that condition."

Similar expressions have appeared and are still appearing in many other newspapers in the Eastern centers, and in addition to this special article on the tour are appearing in weekly and monthly publications. Two illustrated articles, with views of the sky lines of Dallas and Fort Worth and of the sea wall at Galveston, were printed in the Chicago Commerce, publication of the Chicago Association of Commerce, and similar articles appeared in the Kansas Citizen, the publication of the Kansas City Chamber of Commerce. The National Business Review of New York has issued a special edition, giving twenty-four pages to the Texas tour, and the American Banker of New York, the American Business Magazine of New York, the Manufacturers Record of Baltimore and many others. All of this is in addition to the daily reports carried by newspapers throughout the United States during the tour and the full reports of speeches by Governor Moody and other Texan speakers by local newspapers in the cities visited. The All-Texas Committee on Ways and Means estimate that at least two thousand columns have been printed about the trip and its object of presenting Texas to the country. The circulation of the publications in which this publicity has appeared is difficult to estimate, but it is certainly more than twenty millions in the opinion of the committee.

KING COTTON WILL PERFORM

In Less Than Thirty Days

He will draw millions of dollars to the county to be spent with the progressive merchants

Will You Be Ready for His Coming?

Is your store in order for the great influx of the season's business. If not, you had better hurry; get your plans lined up for your full share of the coming business. He's coming fast.

Biggest Corn Crop History of County

Navarro County can boast of having made one of the biggest corn crops in its history which assures plenty of feed for the next year.

This means that the rural districts will not have to spend cotton money for feedstuff, thereby releasing a major part of the income to be spent at will.

With plenty of feed for the stock and home grown food consumption, and with a big cotton crop already assured Navarro County will have its best and most prosperous year.

Everyone should be up and doing in order to get their full share of the coming prosperity.

IT WILL BE HERE FOR YOU IF

Bumper Feed and Cotton Crops Bring Prosperity

The time of the year is at hand when Nature generously rewards man for his labor during the Spring and Summer months.

Fall is just around the corner, waiting to be ushered in under the most flattering circumstances.

With crops this year having been raised at the lowest cost in history, means that the cotton dollar will be worth more than at any time in the past.

The time has come when we must all cash in; and the sooner we get ready the better it will be.

BIG COTTON CROP

It is estimated by conservative business men that Navarro County will crowd the one hundred thousand mark in cotton which at an average price will put the county in excellent condition.
